Hygiene Protocols for Hill Hall

1. **Washing hands** regularly, including before and after entering the building, and whenever changing rooms if possible.

2. **Wearing a face covering** to reduce the chances of any aerosol transmission of viruses is strongly encouraged.

3. **Wearing gloves** as much as possible to reduce exposure of your hands (and do not reuse them!)

4. **Wiping down surfaces** that you have touched with disinfectant wipes when available for your lab.

5. **Wearing a lab coat** in the building at all times to reduce the chances of clothing becoming contaminated. Wash the lab coat regularly. If you do not have a lab coat please try to obtain one. If you don’t have one, please change clothing when you get home and wash the clothing you were wearing at the lab.
